

Send Or Receive Text Messages from your existing business phone number.

No integration or changes to your phone system.

77% of consumers have a more positive impression of companies that offer texting

90% Open rates on texts versus 18% on email and 1% on social media

89% of customers prefer texting as form of communication.

Texting Line is a secured cloud based service that allows you to send and receive text messages on your desktop, mobile phone or tablet.

Texting has become the new norm. Businesses need to be able to send & receive text messages professionally, like email.

Simplicity

Customers like a single point of contact – voice calls and landline texting use the same number.

Trackability

Our service guarantees all text communications are searchable and archived. Employees do not have to use their personal cell phones to text your customers. Easily keep track of all employee/customer text conversations.

Increase Engagement

Customers are already sending text messages. Are you getting them?

Increase Market Share

Younger generations prefer communicating through texting.

Texting Line software supports TCPA best practices with its emphasis on conversational, two-way texting. Texting Line employs industry-leading safeguards to protect both businesses and consumers from spam.

Real-Time Monitoring – of all texting activity along with the ability to block words, phrases or hyperlinking third party content.
