Document360 Use Cases

What can you build with Document360?

Product Help Docs

Build a world-class, self-service knowledge base for your SaaS products.

Technical Documentation

Create how-to guides, tutorials, reference docs, system docs, and release notes.

Online User Guides

Replace offline, static, PDF user guides with guides you can always keep up-to-date.

FAQs

Build great FAQ pages that require constantly adding or updating Questions & Answers.

Internal knowledge base

Build a private, login required, documentation for employees or clients.

Standard Operating Procedures

Build SOP's like employee handbooks or sales/marketing playbook.

Scale your customer support without increasing the costs.

Help your customers with a fully-functional knowledge base that they can use to solve problems. Make it easy for your customers to learn how to use your product with Document360!

73%

Of people prefer self-service support over waiting for a reply.

89%

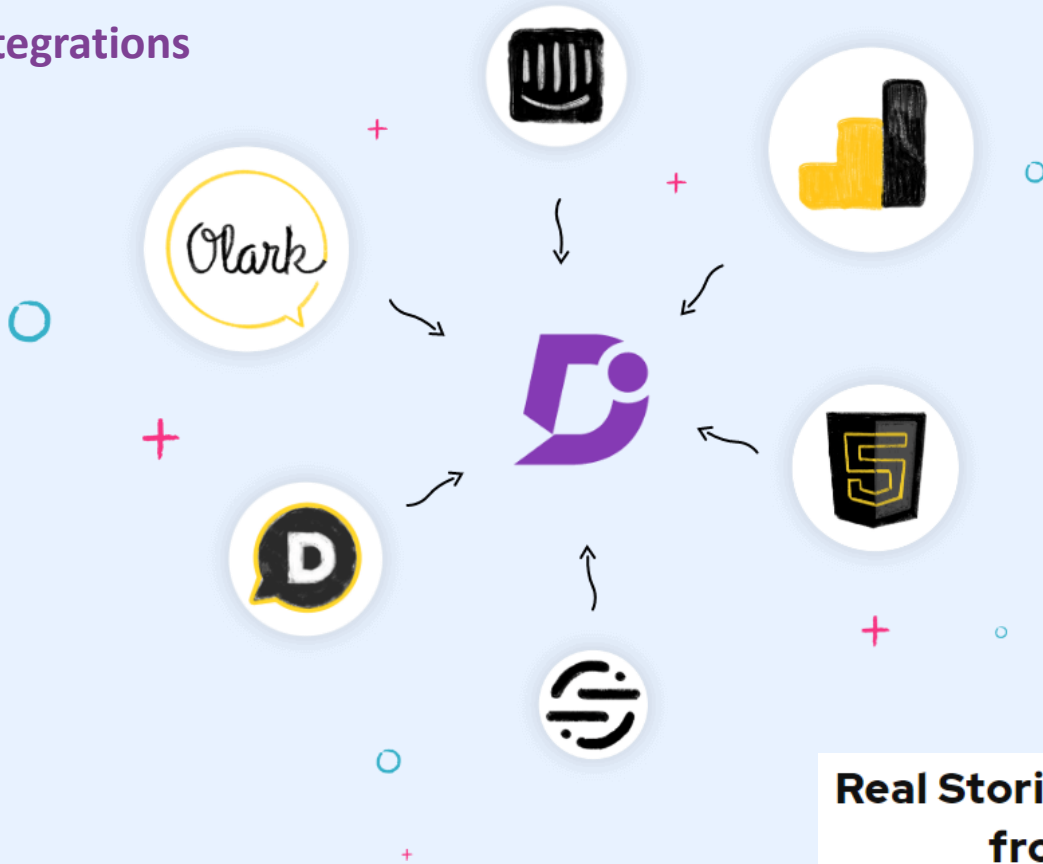

Of millennials use a search engine to find answers before making a call to get customer service.

57%

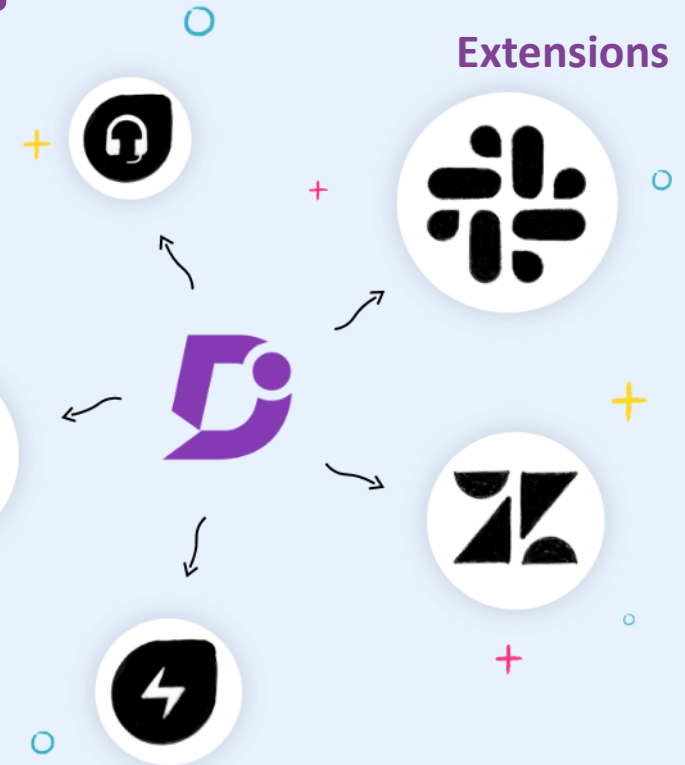

Of calls come from customers who visited the company's website first.

Integrate Effortlessly to your Existing Tools & Software's
